When electrical engineers Ryan McNear and Foster Reed co-authored two patents for company cash incentives, they thought it was all just a joke. One described the soul as a software algorithm and the other described the Big Bang as a power generator.

But when the company crashes, McNear finds himself divorced, desperately hard-up, and estranged from his son. As he rebuilds his life, McNear discovers Reed has used their nonsensical patents to draw in top-tier energy investors. A patent war erupts, and McNear is suddenly immersed in something much bigger than a personal argument with his old friend: a battle between hard science and evangelical religion. To fix the mistakes of his past, he will have to risk everything—his reputation, his livelihood, and even his sanity—to be with the son he loves.

Set in the age-old culture war between science and religion, *The God Patent* is a modern story that deftly blends scientific theory with one man's struggle to discover his soul.
