Essentials of Human Physiology for Pharmacy (Pharmacy Education Series)

Laurie Kelly McCorry

Essentials of Human Physiology for Pharmacy (Pharmacy Education Series) Laurie Kelly McCorry
Textbooks on human physiology abound. However, they are either basic in nature or are rigorous treatments written for medical and graduate students and exceed the level of detail that student pharmacists need. Putting important topics right at your fingertips, *Essentials of Human Physiology for Pharmacy* describes physiology with just the right amount of detail.

The book begins with an overview of cell membrane physiology emphasizing nerve cell function. This is followed by a detailed discussion of the two major regulatory systems in the body, the nervous system and the endocrine system. The author provides in-depth discussions of the muscular, cardiovascular, respiratory, digestive, and renal systems. She focuses on how tissue and organ function is regulated in order to maintain homeostasis.

Underlining the connection between the two disciplines, subsections separate from the actual text relate concepts in physiology to the practice of pharmacy. The clear, concise presentation of important principles and mechanisms, make the book an invaluable resource that you will refer to time and time again.
