Handbook of Mathematical Formulas and Integrals

Alan Jeffrey

Handbook of Mathematical Formulas and Integrals Alan Jeffrey

If there is a formula to solve a given problem in mathematics, you will find it in Alan Jeffrey's **Handbook of Mathematical Formulas and Integrals**. Thanks to its unique thumb-tab indexing feature, answers are easy to find based upon the type of problem they solve. The **Handbook** covers important formulas, functions, relations, and methods from algebra, trigonometric and exponential functions, combinatorics, probability, matrix theory, calculus and vector calculus, both ordinary and partial differential equations, Fourier series, orthogonal polynomials, and Laplace transforms. Based on Gradshteyn and Ryzhik's **Table of Integrals, Series, and Products, Fifth Edition** (edited by Jeffrey), but far more accessible and written with particular attention to the needs of students and practicing scientists and engineers, this book is an essential resource. Affordable and authoritative, it is the first place to look for help and a rewarding place to browse.

Special thumb-tab index throughout the book for ease of use

Answers are keyed to the type of problem they solve

Formulas are provided for problems across the entire spectrum of Mathematics

All equations are sent from a computer-checked source code

Companion to Gradshteyn: **Table of Integrals, Series, and Products, Fifth Edition**

The following features make the **Handbook** a Better Value than its Competition:

Less expensive

More comprehensive

Equations are computer-validated with *Scientific WorkPlace(tm)* and *Mathematica(r)*

Superior quality from one of the most respected names in scientific and technical publishing

Offers unique thumb-tab indexing throughout the book which makes finding answers quick and easy

From reader reviews:

Melvin Loch:

The book Handbook of Mathematical Formulas and Integrals can give more knowledge and also the precise product information about everything you want. Why then must we leave the good thing like a book Handbook of Mathematical Formulas and Integrals? A few of you have a different opinion about reserve. But one aim which book can give many info for us. It is absolutely right. Right now, try to closer together with your book. Knowledge or details that you take for that, you may give for each other; it is possible to share all of these. Book Handbook of Mathematical Formulas and Integrals has simple shape nevertheless, you know: it has great and big function for you. You can look the enormous world by open up and read a guide. So it is very wonderful.

Warren Ford:

In this 21st millennium, people become competitive in every single way. By being competitive at this point, people have do something to make them survives, being in the middle of often the crowded place and notice by surrounding. One thing that often many people have underestimated it for a while is reading. Yep, by reading a e-book your ability to survive raise then having chance to remain than other is high. For yourself who want to start reading a book, we give you this kind of Handbook of Mathematical Formulas and Integrals book as nice and daily reading publication. Why, because this book is usually more than just a book.

Sue Eldred:

The book untitled Handbook of Mathematical Formulas and Integrals contain a lot of information on that. The writer explains the woman idea with easy way. The language is very clear to see all the people, so do certainly not worry, you can easy to read that. The book was published by famous author. The author provides you in the new age of literary works. It is possible to read this book because you can read on your smart phone, or gadget, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site in addition to order it. Have a nice go through.

Roy Rogers:

In this period of time globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher which print many kinds of book. Often the book that recommended to your account is Handbook of Mathematical Formulas and Integrals this e-book consist a lot of the information on the condition of this world now. This kind of book was represented how does the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. The particular writer made some exploration when he makes this book. Here is why this book suited all of you.
