Marine Conservation Biology: The Science of Maintaining the Sea's Biodiversity

Michael E. Marine Conservation Biology Institute

Marine Conservation Biology: The Science of Maintaining the Sea's Biodiversity Michael E. Marine Conservation Biology Institute

Humans are terrestrial animals, and our capacity to see and understand the importance and vulnerability of life in the sea has trailed our growing ability to harm it. While conservation biologists are working to address environmental problems humans have created on land, loss of marine biodiversity, including extinctions and habitat degradation, has received much less attention. At the same time, marine sciences such as oceanography and fisheries biology have largely ignored issues of conservation.

Marine Conservation Biology brings together for the first time in a single volume leading experts from around the world to apply the lessons and thinking of conservation biology to marine issues. Contributors including James M. Acheson, Louis W. Botsford, James T. Carlton, Kristina Gjerde, Selina S. Heppell, Ransom A. Myers, Julia K. Parrish, Stephen R. Palumbi, and Daniel Pauly offer penetrating insights on the nature of marine biodiversity, what threatens it, and what humans can and must do to recover the biological integrity of the world's estuaries, coastal seas, and oceans.

Sections examine: distinctive aspects of marine populations and ecosystems; threats to marine biological diversity, singly and in combination; place-based management of marine ecosystems; the often-neglected human dimensions of marine conservation.

Marine Conservation Biology breaks new ground by creating the conceptual framework for the new field of marine conservation biology -- the science of protecting, recovering, and sustainably using the living sea. It synthesizes the latest knowledge and ideas from leading thinkers in disciplines ranging from larval biology to sociology, making it a must-read for research and teaching faculty, postdoctoral fellows, and graduate and advanced undergraduate students (who share an interest in bringing conservation biology to marine issues). Likewise, its lucid scientific examinations illuminate key issues facing environmental managers, policymakers, advocates, and funders concerned with the health of our oceans.

From reader reviews:

Molly Edwards:

Do you among people who can't read pleasurable if the sentence chained from the straightway, hold on guys this specific aren't like that. This Marine Conservation Biology: The Science of Maintaining the Sea's Biodiversity book is readable simply by you who hate the straight word style. You will find the details here are arrange for enjoyable examining experience without leaving even decrease the knowledge that want to deliver to you. The writer regarding Marine Conservation Biology: The Science of Maintaining the Sea's Biodiversity content conveys thinking easily to understand by many individuals. The printed and e-book are not different in the articles but it just different as it. So , do you even now thinking Marine Conservation Biology: The Science of Maintaining the Sea's Biodiversity is not loveable to be your top listing reading book?

Jared Williams:

This book untitled Marine Conservation Biology: The Science of Maintaining the Sea's Biodiversity to be one of several books that will best seller in this year, here is because when you read this reserve you can get a lot of benefit in it. You will easily to buy this kind of book in the book retail outlet or you can order it by way of online. The publisher of the book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Touch screen phone. So there is no reason for your requirements to past this publication from your list.

Jose Brown:

Reading a book being new life style in this 12 months; every people loves to learn a book. When you read a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you would like get information about your review, you can read education books, but if you want to entertain yourself look for a fiction books, these kinds of us novel, comics, along with soon. The Marine Conservation Biology: The Science of Maintaining the Sea's Biodiversity offer you a new experience in reading through a book.

Lauren Zavala:

That e-book can make you to feel relax. This kind of book Marine Conservation Biology: The Science of Maintaining the Sea's Biodiversity was multi-colored and of course has pictures on there. As we know that book Marine Conservation Biology: The Science of Maintaining the Sea's Biodiversity has many kinds or variety. Start from kids until teens. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore , not at all of book are usually make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading which.
