Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene Lindsey Gillson

Ecosystems today are dynamic and complex, leaving conservationists faced with the paradox of conserving moving targets. New approaches to conservation are now required that aim to conserve ecological function and process, rather than attempt to protect static snapshots of biodiversity. To do this effectively, long-term information on ecosystem variability and resilience is needed. While there is a wealth of such information in palaeoecology, archaeology, and historical ecology, it remains an underused resource by conservation ecologists. In bringing together the disciplines of neo- and palaeoecology and integrating them with conservation biology, this novel text illustrates how an understanding of long-term change in ecosystems can in turn inform and influence their conservation and management in the Anthropocene. By looking at the history of traditional management, climate change, disturbance, and land-use, the book describes how a long-term perspective on landscape change can inform current and pressing conservation questions such as whether elephants should be culled, how best to manage fire, and whether ecosystems can or should be "re-wilded"

Biodiversity Conservation and Environmental Change is suitable for senior undergraduate and post-graduate students in conservation ecology, palaeoecology, biodiversity conservation, landscape ecology, environmental change and natural resource management. It will also be of relevance and use to a global market of conservation practitioners, researchers, educators and policy-makers.

From reader reviews:

Crystal McMullen:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite book and reading a book. Beside you can solve your short lived problem; you can add your knowledge by the publication entitled Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene. Try to face the book Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene as your pal. It means that it can to become your friend when you feel alone and beside that of course make you smarter than ever before. Yeah, it is very fortunated for yourself. The book makes you a lot more confidence because you can know everything by the book. So , let me make new experience and also knowledge with this book.

Dorinda Kling:

As people who live in often the modest era should be revise about what going on or details even knowledge to make these keep up with the era that is always change and move ahead. Some of you maybe may update themselves by examining books. It is a good choice for you personally but the problems coming to anyone is you don't know which one you should start with. This Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene is our recommendation to make you keep up with the world. Why, since this book serves what you want and need in this era.

Patricia Henderson:

Now a day folks who Living in the era wherever everything reachable by talk with the internet and the resources in it can be true or not call for people to be aware of each details they get. How a lot more to be smart in getting any information nowadays? Of course the solution is reading a book. Studying a book can help individuals out of this uncertainty Information specially this Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene book because book offers you rich details and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you know.

Andrew Purdie:

This Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene usually are reliable for you who want to be described as a successful person, why. The main reason of this Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene can be among the great books you must have is usually giving you more than just simple reading food but feed a person with information that possibly will shock your before knowledge. This book is handy, you can bring it almost everywhere and whenever your conditions at e-book and printed ones. Beside that this Biodiversity Conservation and Environmental

Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene forcing you to have an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we understand it useful in your day activity. So , let's have it and luxuriate in reading.
