Understanding LED Illumination M. Nisa Khan

Understanding LED Illumination elucidates the science of lighting for light emitting diodes. It presents concepts, theory, simulations, and new design techniques that shine the spotlight on illumination, energy efficiency, and reducing electrical power consumption. The text provides an introduction to the fundamentals of LED lamp design, and highlights the principles of large-space and 3D object illumination for developing competitive LED lamps.

The first part of the book discusses lamp output metrics and characterization methods, while the second part of the book explores certain retail and prototype lamp comparisons with theory, simulations and experiments. It details the light propagation and distribution characteristics of LED light sources for general illumination applications, and presents design and simulation requirements for LED lamps suited for real-world applications. It also addresses light generation, efficiency, theoretical limits, efficiency limiting factors, and LED lamp design elements.

- Emphasizes the lighting aspects for LED lamps: quality and improvement
- Describes the basics of junction diode and the intricacies of compound semiconductor optoelectronic properties including the thermal, electrical, optical, and mechanical aspects
- Explains the challenges of LED lighting in scientific and mathematical terms
- Includes case studies from Osram Optosemiconductors, Sylvania, and Phillips, GE, and others

The book characterizes several LED replacement lamps for household and commercial lighting and discusses a novel design for improving tubular LED replacements. It takes the mysteries out of solid-state lighting for lighting designers, and helps LED scientists and engineers effectively design their products to provide high-quality illumination.

From reader reviews:

Sarah Creamer:

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each publication has different aim or maybe goal; it means that publication has different type. Some people really feel enjoy to spend their a chance to read a book. These are reading whatever they consider because their hobby is usually reading a book. What about the person who don't like examining a book? Sometime, individual feel need book after they found difficult problem or maybe exercise. Well, probably you should have this Understanding LED Illumination.

Theresa Villarreal:

Book will be written, printed, or illustrated for everything. You can recognize everything you want by a book. Book has a different type. As we know that book is important issue to bring us around the world. Adjacent to that you can your reading skill was fluently. A book Understanding LED Illumination will make you to possibly be smarter. You can feel far more confidence if you can know about every little thing. But some of you think that will open or reading the book make you bored. It's not make you fun. Why they might be thought like that? Have you trying to find best book or suited book with you?

Melanie Fox:

The book Understanding LED Illumination can give more knowledge and information about everything you want. Exactly why must we leave a very important thing like a book Understanding LED Illumination? A number of you have a different opinion about publication. But one aim which book can give many info for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or information that you take for that, you could give for each other; it is possible to share all of these. Book Understanding LED Illumination has simple shape but you know: it has great and massive function for you. You can appearance the enormous world by start and read a book. So it is very wonderful.

Gladys Jackson:

People live in this new moment of lifestyle always attempt to and must have the extra time or they will get great deal of stress from both everyday life and work. So , when we ask do people have time, we will say absolutely of course. People is human not just a robot. Then we inquire again, what kind of activity do you possess when the spare time coming to an individual of course your answer can unlimited right. Then do you try this one, reading publications. It can be your alternative within spending your spare time, often the book you have read is Understanding LED Illumination.
