Mineral Materials Modeling: A State-of-the-Art Review (Routledge Revivals)

Mineral Materials Modeling: A State-of-the-Art Review (Routledge Revivals)

Originally published in 1976, this study was undertaken to fill a gap in knowledge about non-fuel resources and the advantages and disadvantages of specific methodologies of analysing material modelling. *Mineral Materials Modeling* examines the influence of factors such as raw material price and availability, technological aspects and related environmental questions in relation to both economic and mathematical models. The results are particularly helpful in terms of forecasting, policy development and decision-making about mineral materials as well as assessing the usefulness of different types of model. This title will be of interest to students of Environmental Studies as well as policy makers and professionals.
