A New Strategy For The War On Cancer: Finally! A New Force Is Entering the Fight and Its Success Depends On Us Terry Thompson

The traditional strategy of exclusive conventional cancer treatment has not worked. Integrative oncology that prescribes tested natural, non-pharmaceutical therapies to enhance the effectiveness and reduce the side effects of chemotherapy, radiation, and surgery is the answer. Major medical school cancer centers are researching and practicing this new state-of-the-art strategy, but it is not being accepted by main stream oncology. It must become acceptable and accessible to all cancer victims if cancer is to ever be defeated. Patients must insist on it and the general public must support it. The objective of A New Strategy for the War on Cancer is to reveal the new strategy to the public and to invoke a paradigm shift toward its adoption.
