Enzyme Nanoparticles: Preparation, Characterisation, Properties and Applications (Micro and Nano Technologies)

Chandra S. Pundir

Enzyme Nanoparticles: Preparation, Characterisation, Properties and Applications (Micro and Nano Technologies) Chandra S. Pundir

This book is the first book in English on nanotechnology and nanomaterials integrating with enzymatic systems, with a focus on nanoparticles and biological applications. It covers comprehensively the relevant topics to understand the development of enzyme nanoparticles as it relates to the complicated structures of enzyme nanoparticles and their functionalization and immobilization on to various supports. The preparation of enzyme nanoparticles, their kinetic properties and applications after immobilization of the immobilized enzyme nanoparticles is described. The use of colour images in all formats of the book will improve the understanding of the topics covered. The book offers an integration of Enzymology and Nanotechnology and provides the latest information on preparation of enzyme nanoparticles, their characterization, their functionalization and immobilization on to various supports and thereafter their kinetic properties and applications in various industries with special reference to Biosensor Technology.

- Focus on enzyme nanotechnology, given the wide appeal of enzymes for diagnostics, therapy and biocatalysis
- Provision of a general background to the topic, but also a detailed description of synthesis, preparation and applications

From reader reviews:

Enrique McLean:

The reserve with title Enzyme Nanoparticles: Preparation, Characterisation, Properties and Applications (Micro and Nano Technologies) contains a lot of information that you can learn it. You can get a lot of advantage after read this book. That book exist new knowledge the information that exist in this reserve represented the condition of the world now. That is important to yo7u to find out how the improvement of the world. This book will bring you in new era of the syndication. You can read the e-book on the smart phone, so you can read the idea anywhere you want.

Kelly McDowell:

People live in this new time of lifestyle always try and and must have the free time or they will get lot of stress from both everyday life and work. So , when we ask do people have time, we will say absolutely of course. People is human not a robot. Then we ask again, what kind of activity are you experiencing when the spare time coming to you actually of course your answer can unlimited right. Then do you ever try this one, reading guides. It can be your alternative inside spending your spare time, often the book you have read is definitely Enzyme Nanoparticles: Preparation, Characterisation, Properties and Applications (Micro and Nano Technologies).

Brenda Wright:

Your reading sixth sense will not betray you actually, why because this Enzyme Nanoparticles: Preparation, Characterisation, Properties and Applications (Micro and Nano Technologies) publication written by well-known writer we are excited for well how to make book that could be understand by anyone who else read the book. Written throughout good manner for you, dripping every ideas and composing skill only for eliminate your own hunger then you still question Enzyme Nanoparticles: Preparation, Characterisation, Properties and Applications (Micro and Nano Technologies) as good book not merely by the cover but also from the content. This is one guide that can break don't determine book by its deal with, so do you still needing a different sixth sense to pick this particular!/? Oh come on your examining sixth sense already told you so why you have to listening to a different sixth sense.

Lee Villegas:

As we know that book is important thing to add our understanding for everything. By a reserve we can know everything we wish. A book is a list of written, printed, illustrated as well as blank sheet. Every year ended up being exactly added. This book Enzyme Nanoparticles: Preparation, Characterisation, Properties and Applications (Micro and Nano Technologies) was filled in relation to science. Spend your extra time to add your knowledge about your technology competence. Some people has diverse feel when they reading the book. If you know how big advantage of a book, you can really feel enjoy to read a e-book. In the modern era like currently, many ways to get book you wanted.
