Physical Therapy for Children Robert J. Palisano, Suzann K. Campbell, Margo Orlin

Used as both a core textbook in PT programs and as a clinical reference, **Physical Therapy for Children, 4th Edition**, provides the essential information needed by PTs, both student and professional, when working with children. Like the previous bestselling editions, the 4th edition follows the practice pattern categories of the *Guide to Physical Therapist Practice* and uses the IFC model of the disabling process as it presents up-to-date evidence-based coverage of treatment. In this latest edition, Suzann Campbell DeLapp, Robert J. Palisano, and Margo N. Orlin have added more case studies and video clips, additional chapters and Medline-linked references online, and *Evidence to Practice* boxes to make it easy to find and remember important information.

- Provides **comprehensive foundational knowledge** in decision making, screening, development, motor control, and motor learning, the impairments of body function and structure, and the PT management of pediatric disorders.
- Reflects a **family-centered care model** throughout to help you understand how to involve children and their caregivers in developing and implementing intervention plans.
- Emphasizes an **evidence-based approach** that incorporates the latest research for the best outcomes.
- **Follows the practice pattern guidelines of the *Guide to Physical Therapist Practice, 2nd Edition*** which sets the standard for physical therapy practice.
- Features the ***International Classification of Function, Disability, and Health (ICF) of the World Health Organization (WHO)*** as the model for the disabling process, emphasizing activity rather than functional limitations and participation rather than disability in keeping with the book's focus on prevention of disability.
- Provides **extensive case studies** that show the practical application of material covered in the text and are often accompanied by online video clips illustrating the condition and its management.
- Makes it easy to **access key information** with plenty of tables and boxes that organize and summarize important points.
- **Clearly demonstrates important concepts and clinical conditions** you'll encounter in practice with over 800 illustrations.
- Takes learning to a deeper level with **additional resources on the Evolve website** featuring:
 - **Over 40 video clips** that correspond to case studies and demonstrate conditions found in each chapter
 - Helpful resources, including **web links**
 - **Questions and exercises** you'll find helpful when preparing for the pediatric specialist certification exam
