The Territorial Future of the City: 3 (Urban and Landscape Perspectives)

The Territorial Future of the City: 3 (Urban and Landscape Perspectives)

The volume brings together contributions by leading scholars and young academics with experience in the urban potential of the territory in situations not necessarily linked to the dense metropolis, its compact form or to city sprawl. What brings these scholars together is their common reflection on this central theme, though from varied disciplinary and experimental backgrounds. They offer new forms of representing social and spatial processes of the contemporary society.
