Changing the Course of Autism

Jane Johnson, Bryan Jepson

Changing the Course of Autism Jane Johnson, Bryan Jepson

A once rare disease, autism is now a worldwide epidemic affecting half a million American children, making it the most common developmental disability - more common than Down syndrome, cerebral palsy, and mental retardation combined. Changing the Course of Autism has the potential to revolutionize the way this disease is perceived and managed by showing that autism can be treated as a medical disease, rather than a behavioral disorder. In this groundbreaking book the authors explain that reducing neurological inflammation improves autistic behaviors dramatically, making a profound impact on the health and future of affected children and their families. The foreword is by Katie Wright, whose parents, Bob and Suzanne Wright, founded the organization Autism Speaks after Katie's son was diagnosed with autism. As CEO of NBC/Universal, Bob made Autism Speaks the biggest autism organization in the country, and Katie and her parents have worked tirelessly to raise autism awareness.
