**Remote Viewing and Sensing for Managers: How to Use Military Psiops for a Competitive Edge** Tim Rifat

This examination of remote viewing—the ability to psychically view distant locations to gain information—and remote sensing—the ability to scan the minds of others to learn more about their emotional and psychological state—shows business leaders how to practice both skills and explains their practical uses. Collectively known as psiops management and used by major corporations such as Intel and governments such as the Indian government, these techniques allow managers to enter a competitor's mindset or to gauge the mood of one's staff. This book teaches companies the latest techniques so they can gain the upper hand in business before their rivals use these skills on them.
