Jurassic Waters E. Johnston Coulombe

A unique sci-fi genetic thriller which delves into the scientific mystery of evolution and keeps you glued to your kindle in this twister of a story. Research geneticist Andrew Collier returns to his homeland, the strange and isolated island of Nakoia, purchased by his family in 1850 during the selling off of the Hawaiian lands. Known locally as the Mystery Island, this dark and cut off place becomes the perfect spot for him to conduct his obsessive genetic research, and in a make shift laboratory he builds in the homestead's back yard he attempts to coax one of earliest known life forms, cyano-bacteria, to mutate and rapidly re-evolve into the next known biological life form, the worm. But, if mutations are all random, this could never happen, or so his colleagues believed. Now, as never before seen, forces of nature are unleashed on Nakoia, Andrew Collier may finally have his question answered, but the cost is far greater than he ever imagined.
